PROFILE

QA Automation Engineer with 2+ years at Atimi Software building test automation for web and mobile client applications in Java (Selenium, Appium, TestNG), TypeScript (Playwright) and Python. Builds AI-assisted QA tooling with Claude Code that turns repeat QA work into a single command. Growing toward CI/CD and DevOps.

SKILLS

Languages: Java, TypeScript, Python, SQL, Bash

Test Automation: Selenium WebDriver, Appium, Playwright, TestNG, pytest, REST Assured, Postman, Apache JMeter, axe-core (WCAG 2.1 AA), Page Object Model

AI Tooling: Claude Code, custom skills, MCP, Ollama

CI/CD and Tools: Jenkins, Azure Pipelines, GitHub Actions, Git, Bitbucket, Maven, JIRA, BrowserStack, Sauce Labs, AWS Device Farm

WORK EXPERIENCE

Associate QA Engineer, Atimi Software, Bengaluru

May 2024 – Present

Joined as QA Trainee

- Write and maintain automated suites for web and mobile client applications on a shared in-house Java framework, with cloud device runs on BrowserStack, Sauce Labs and AWS Device Farm
- Functional, regression, UI, API and accessibility testing across several concurrent client projects, balancing manual and automated coverage
- Log and track defects in JIRA with development teams; take part in sprint planning and daily stand-ups

PROJECTS (CLIENT WORK AT ATIMI)

Easy Drugs | *Canadian pharmaceutical e-commerce platform*

- Built and extended 120+ automated test cases in Java, Selenium and TestNG across product listings, prescription workflows, checkout and account management
- Refactored the framework into a Page Object Model, cutting maintenance overhead by 65%
- REST Assured and Postman modules validating API request and response payloads, with SQL checks asserting database state behind each UI flow

Atimi Website Rebuild | *QA owner for a ground-up corporate website rebuild*

- Wrote the v1.0 Test Plan spanning 17 epics across functional, accessibility, performance, security and SEO, with a 70% automation coverage target
- Built the TypeScript and Playwright framework ahead of the new build; proved it against the live site with 173 executions across 8 browser and device projects
- WCAG 2.1 AA scans with axe-core on every story; surfaced two real defects including a Level A keyboard trap

Dminer Data Quality Automation | *Python tooling for a client's internal data platform*

- Rule-based and hand-read verification of 10,708 company records; identified 2,460 bad rows (23% of the table)
- Reconciled 465 projects across four conflicting sources; every one of the 76 rows later deleted upstream was already in the flagged set
- Selenium with a persistent Chrome profile for headless contact lookup against public profiles

AI-Assisted QA Tooling | *Custom Claude Code skills in daily use*

- Competitor app teardown pipeline consolidating 544 feature rows across 13 apps, plus an APK decompilation kit reporting SDKs, vendors and architecture
- Test report triage turning TestNG and Extent results into standup notes and a failure breakdown
- Markdown to branded Word round-trip in stdlib Python, verified on 4 documents; company lookup on a local qwen3 model grounded in web search

EDUCATION

B.Tech, Computer Science, University of Engineering & Management, Kolkata

2019 – 2023

- CGPA 8.33 / 10, among the top 5% of the batch
- Class 12 (Science): 60.8%, Class 10: CGPA 8.8 / 10, Gyan Niketan Senior Secondary School, Patna
